

# WELCOME TO

“Access to Information and Access to Services of Persons with Disability through E-specialized services”

**Supported by:**

**Prime Minister Office, Government republic of Bangladesh**

**Service Innovation Fund**

**Access to information (A2I programme)**

# Background

**During the last 37 years, CRP treated around**

- 7,000 Spinal Cord Injured Patients & 5,000 Children with physical disabilities, in clinical settings
- Around 6,000 persons with disabilities were part of vocational training
- Around 1,200,000 persons with physical disabilities received services (both clinical and community) from CRP.

# Background

Patients' follow up programme (outreach programme):

Outreach programme is running by CRPs' SWD & CBR department once a week for the Spinal Cord Injured (SCI) patients within Dhaka division. This program on average covers 3 patients in day.

It is important to reach patients to prevent further medical complications as well as getting proper socio-economic rehabilitation especially for the SCI patients and children with physical disabilities. This ongoing process is conducted by social workers (not disability intervention expert) and it can be time consuming and expensive. If SCI patient needs to meet with other health experts they come to CRP centres.

In order to improve this programme and bring more services to the user's home, CRP proposed to A2I (Access to Information) funders and A2I decided to finance the programme

# Proposed initiative addresses:

- Time consuming and costly patient follow-up procedure
- Access to specialized services for persons with disabilities at their homes

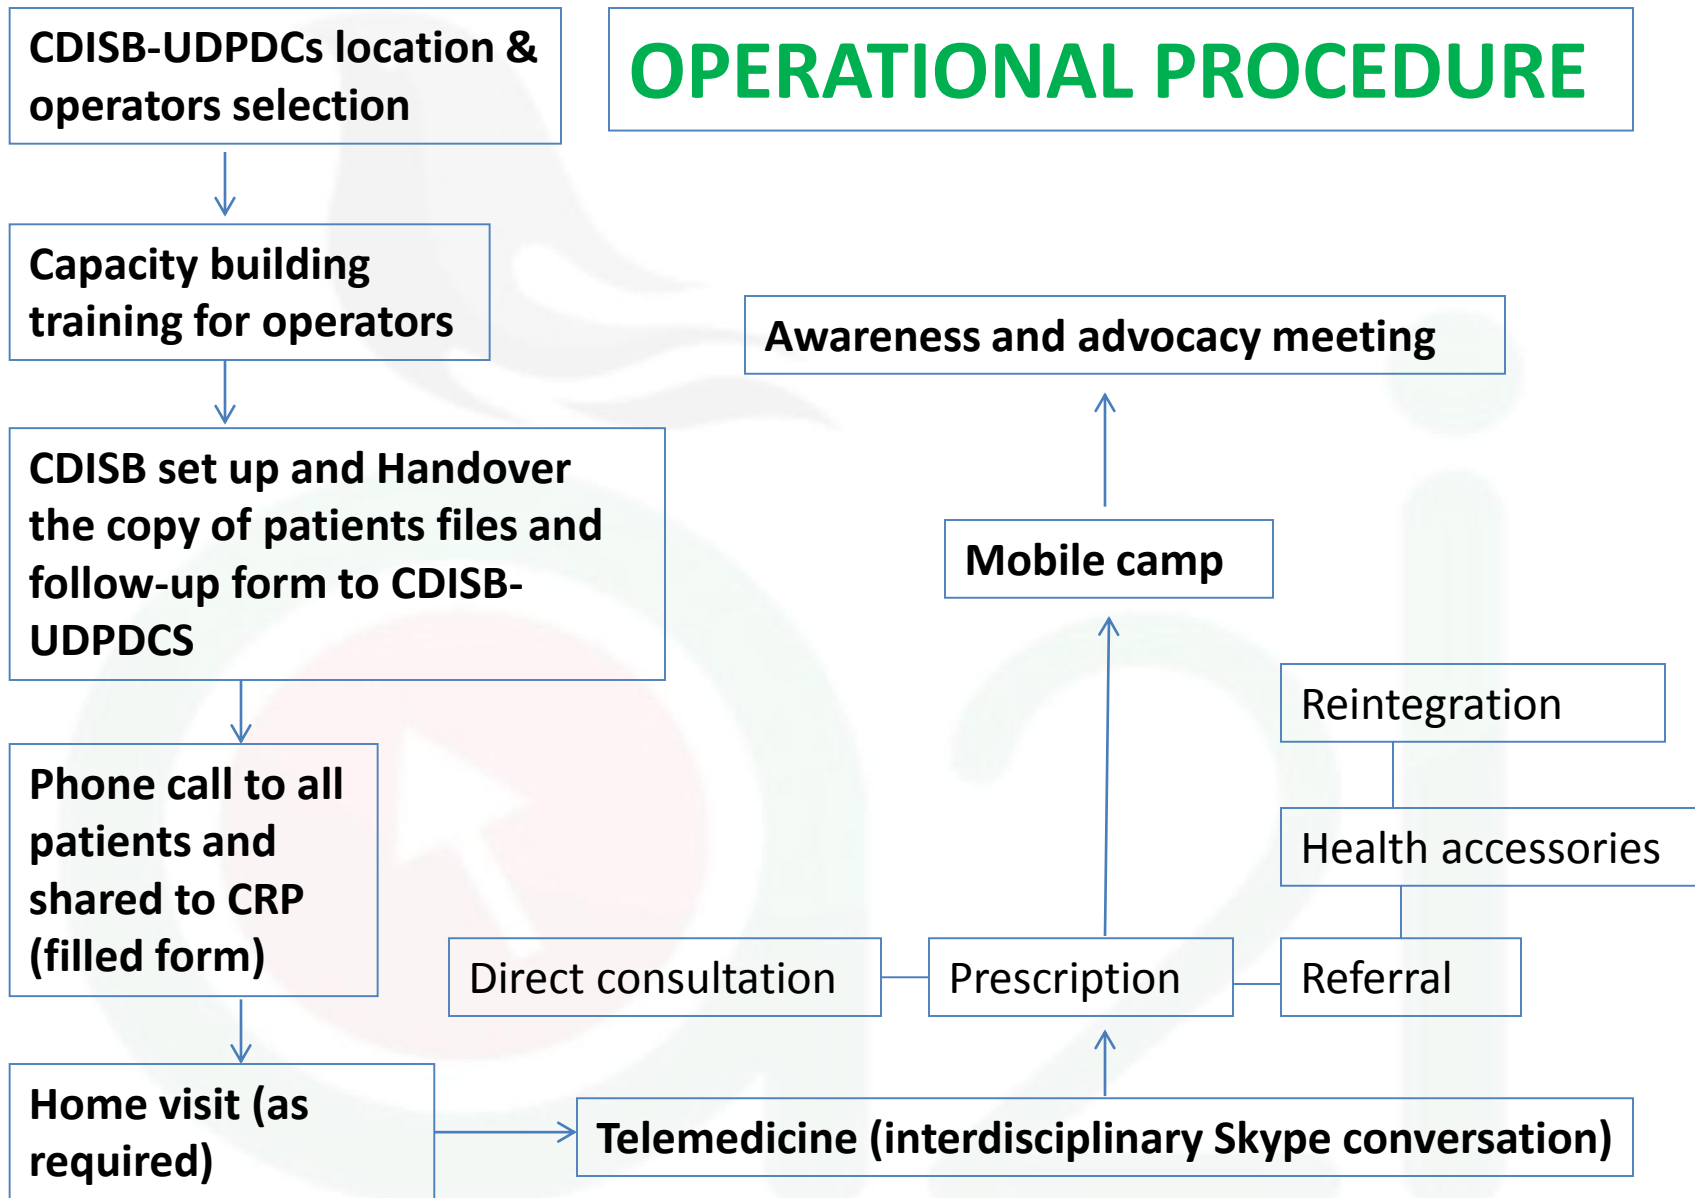

# Target Population

- CRP Spinal Cord Injury patients (former, follow-up)
- CRP outdoor patients and other community members who need the rehabilitation and therapeutic services/consultation in their community

# Project Activities

SN	Items
1	Patient follow-up (Phone/Home visit)
2	Telemedicine (Interdisciplinary Skype conversation)
3	Health Accessories
4	Community Mobile Clinic
5	Disability awareness and advocacy meeting

# OPERATIONAL PROCEDURE

**CDISB** : community Digital Information and Service Booth

**UDPDC**: Upazilla Disable People Development Counsel

# INCLUSION CRITERIA

- SKILLS
- SECURITY
- EXPERIENCE
- MOTIVATION

# Capacity building training of CDISB operators

# COMMUNITY SET-UP

# Location OF CDISB

1. Bakergonj, Barisal
2. Delduar, Tangail
3. Isshorgonj, Mymensing
4. Kaliakoir, Gazipur
5. Khulna Mohanagar
6. Mohonpur, Rajshahi
7. Araihasar, Narayangonj
8. Singair, Manikgonj

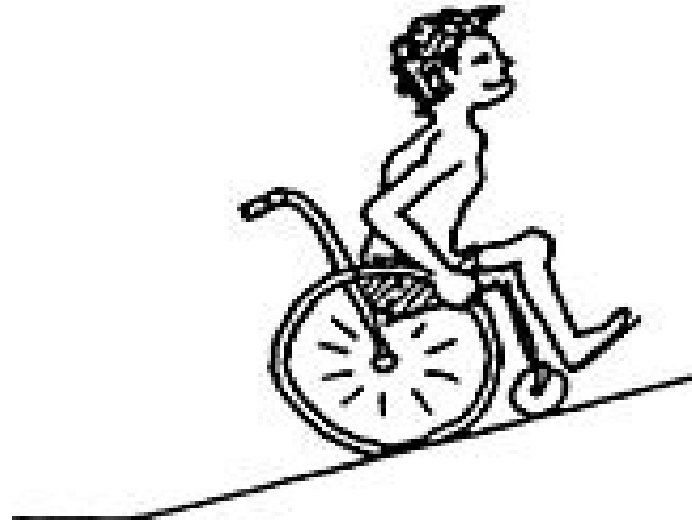

# Interdisciplinary Skype conversation (MDT Follow-up)

# 6 month results:

S.I	Project Activity	Quantity
01	Home visit	414
02	Phone follow-up	2413
